The vocabulary behind who moved my heap

00

Agenda

The terms used in the rest of this talk. Every reference links to Oracle.

#	Topic	In one line
01	"Dollar" classes	Anonymous classes and their `Outer$1` names
02	Object pooling	Reusing objects; the `Integer` cache
03	Compressed OOPs	4-byte references on a 64-bit JVM
04	Compact object headers	One 8-byte header word (JDK 25)
05	Stream API	`ReferencePipeline`; lazy and eager operations
06	Lambdas	Capturing vs fat-free
07	Escape analysis	When the JIT removes an allocation
